

## Custom Drum Scan Pricing

Highest quality images come from our HiResolve 8000 ppi drum scanner—deeper shadow detail from its high dynamic range and lack of gradient banding seen in desktop CCD scans. This heavy-duty scanner is particularly suited to huge enlargements using variable apertures which help minimize film grain. You receive scans that are ready to go directly to press or other destinations.

- Price includes:**
- Professional color correction
  - Scaling/sharpening
  - Removal of facial blemishes
  - Fluid mounting for top quality
  - RGB 72 ppi JPEGs if desired as well
  - Tone & contrast adjustment
  - Cleanup of dust/scratches
  - Fix red eyes/yellow teeth, etc.
  - CMYK specific to your needs
  - CD or digital file upload

Pricing is based on the page layout's **final cropped** file size in megabytes (not necessarily the full frame). It's a better deal.

16x20 CMYK • 17x25 RGB
20x24 CMYK • 22x29 RGB
20x27 CMYK • 24x30 RGB

**Quantity discounts on drum scans:**

6-10 .....	.5%	16-20 .....	.15%	51-100 .....	.25%
11-15 .....	.10%	21-50 .....	.20%	101+ .....	.30%

**Digital Proofing:** Ganged CMYK proofs of scans placed in your picture boxes—16 cents per square inch image area, \$10 minimum. Proofs are run through our carefully profiled ProofMaster RIP for excellent press representation.

- Notes:**
- Originals must be flexible to wrap around scanner drum, or must be scanned on flatbed CCD scanner.
  - Maximum transparency size 8x10". Negatives and reflective copy also accepted.
  - 72 hour turnaround standard with reasonable quantities, often sooner when workload permits. Please call.
  - Additional Photoshop work available at moderate hourly rates.
  - Custom prepared Black & White conversions from color or negs same price as RGB
  - Black & White (reflective copy only) assessed at smaller grayscale file size
  - Digital proofs recommended—and reliable.
